

Digital Stream Meters

General Safety Notice

- Any Stream or river is a hazardous environment.
- Extreme caution must be taken in guidance of pupils and safety guidelines set.
- Schools are encouraged to consult their LEA, Governing Body or Education Board for any advice.

Consider:-

1. NOT operating in flow over 1.2m/second with school pupils. The smaller and younger the pupils are, the lower the flow or turbulence in which they can safely operate.
2. Using life jacket or buoyancy aid when pupils cannot swim, when the river is deep, or you have any concerns about safety.
3. Tying a safety rope across the river / stream below the measuring point so any person has a grab line should they slip.
4. A minimum group size of 2, or even 3 pupils.

NOT using waders with small people who may be swept away or who would have great difficulty in moving should the waders fill with water.

- *Educational Field Equipment UK Ltd, or any of its subsidiaries, cannot have any responsibility or liability for the use of the equipment.*
- *Be aware of unsuitable environments, polluted waters, sudden changes in discharge, unruly pupils, hazardous situations or pupils working without supervision.*
